fumigated

115 x 95 cm
fumigado

115 x 115 cm
fumigated

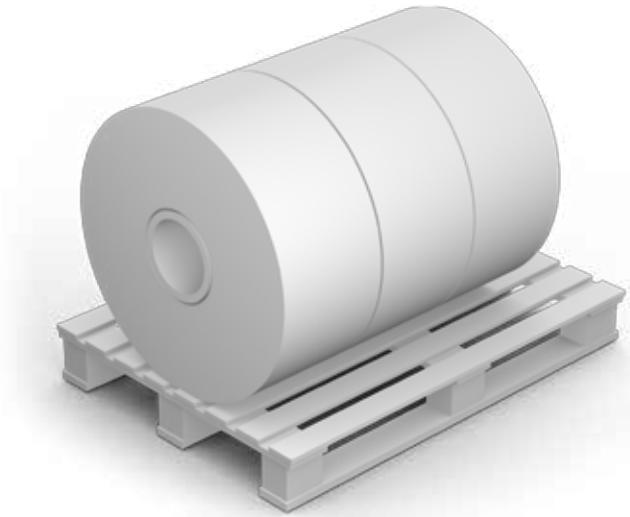

PACKAGING REQUIREMENTS

STANDARD PALLET – REELS VERTICAL POSITION

- A standard pallet is defined as assigning the most fitting pallet for the requested material quantity.
- Clients who request Euro Pallets 80 x 120 with reels in vertical position will always accept that the quantity requested is greater than 3.000 m² and permits packing of mixed widths.
- In the case that the client requests packing of “separate widths”, it is necessary for 3.000 m² per width.
- In the case that the client requests a material of 2.000 m² from the wine & spirits range and the product exceeds 60 cm in diameter by 2.000 lm, it will be necessary to use pallet size 80 x 80.
- In the case that the client requests 4.000 m² at 2.000 lm of a product from the wine & spirit range and the product exceeds 60 cm in diameter, this will NOT be placed on a Euro Pallet 80 x 120, but will be placed on pallet size 80 x 80, one production run per pallet.
- Maximum height 1,20 m (paper) plus 15 cm (pallet) material in slit reels.
- If the reels are unslit (entire rolls):
 - 1 metre (paper) plus 15 cm (pallet).
 - 1, 50 metres (paper) plus 15 cm (pallet).
 - 2 metres (paper) plus 15 cm (pallet).

PACKAGING REQUIREMENTS

STANDARD PALLET AND REELS IN HORIZONTAL POSITION (Belly-packed)

- When the client requests belly-packed reels, they will be packed in the horizontal position when material is from 2.000 lm / 2.000 m² in a Euro Pallet 80 x 120.
- In the case that the product is net width, for example that the customer requests 2.500 m², in this case 2.000 m² of the reels will be belly-packed in a Euro Pallet 80 x 120 with the rest (500 sqm) on a pallet 80 x 60 in vertical position.

We are completely disposed to send to the client a packing list of their requested order to adapt the packaging to their needs upon request.

FSC:

"OPTION FOREST CERTIFICATE" these materials can be supplied with the FSC or PEFC certificate with a different reference and price:

- FSC or PEFC reference: the same product code replacing the first digit with a "C". (Ex: 3030066107 vr C030066107).
- FSC or PEFC price: under request.
- FSC or PEFC products are not available in nett width.

BACKING:

All products are produced without back printing, except SH 6020 Plus, the main part which have printing on the backing.

ROLL LENGTH:

P-1000 / P-1 / RF-20: max. 6 000 l.m., prior homologation and provides that the diameter <120 cm.

Transadhesive range: max. 2.500 m.l.

Others: max. 3.000 m.l., provided that the diameter < 100 cm

Any other request must be correctly tested previosly
